Tino – Nature Stone

Danespan Quality Kitchens

Bovis Lend Lease was assigned the Project Management for a new private housing development consisting of 22 luxury chalets in the most spectacular area overlooking the coast and the Mediterranean Sea. The developer of the project is Retamar Santa Matilde, S.L.

Each chalet has between 286 – 330 m2 sf and 3 – 5 rooms. The architecture is inspired by the Scandinavian style of pure and minimalist lines, big glazed surfaces with a touch of the andalusian constructions. The interior of the houses have been decorated in a smart and functional style, using the best quality materials.

The kitchen and bathroom are designed individually according to the requirements and taste of every client. The household appliances are by Gaggenau, the electrical items are by Dornbracht, the natural stone for the bathrooms are by Tino and the toilets are by Villeroy Boch.

The chalets include a home automation system and one of the best Alarm Systems in the market. The security is a key issue in the Project and the area is kept watched during 24 hours. Each house has a private garden and a huge swimming-pool overlooking the Mediterranean Sea.
